150+
PROFESSIONAL TEAM

3000+
SATISFIED CUSTOMERS

Powered by:

Central Vacuum Systems

Central Vacuum System functions through outlets in different rooms. You can vacuum your space, noiselessly, without having to drag heavy equipment. The dust is sucked into the inlets which are connected to a central vacuum unit where it drains out automatically. There is no need to clean or change the dust bag.

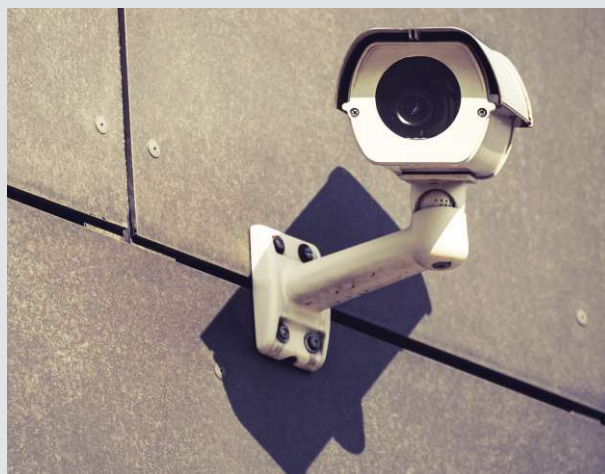

Fresh Air System

Aegis Fresh Air systems provides fresh air indoors by filtering the incoming air through pre-filter, carbon filter, and HEPA filter thus eliminating dust and other microbes up to 2.5 microns. The system uses heat recovery to reduce loss of cooling or heating during the exchange of outgoing and incoming air so as to maintain an ambient temperature in-house. Also, it controls the relative humidity thereby increasing the air quality inside the premises.

CCTV Solutions

We are empaneled vendors to the Government of Telangana Police Department, installing IP based CCTV cameras along with (CCC) command control centers. Having provided solutions to top residential, city surveillance, govt. Institutions, BFSI, retail and commercials and many others. We have left no segment unsecured and no application unexplored.

Building Energy Management

The energy in the form of electricity, gas, water etc., consumed in any gated community can now be monitored through our unique systems. Aegis monitoring solution is a combination of utility monitoring, DG set monitoring and periphery lighting. Automating these interconnected aspects, gives a single user touch point to monitor the entire gated community. The data collected can be used by township operators, to keep track of consumption, and billing of various services used by the township.

Fire Protection System

Aegis fire and electronic securities system includes installation, testing and commissioning of Fire Alarm System, Fire Hydrant System, Sprinkler System and Fire extinguishers as per the statutory laws of Local Fire Authority, Tariff Advisory Committee (TAC) and NFPA.

Home Locking System

Secure, monitor and control your home with a range of smart devices, be it a Door Lock, Alarm or a Digital Door Viewer, the wide range of Smart Living products available, puts you in control of your home security.

We are the authorised partners of the world-class Yale Smart Living range for standalone products, Digital locks and Door Accessories that are connected with the Yale Smart Home app.
